

## Indications for non-invasive ventilation

```
graph TD; A[Indications for non-invasive ventilation] --> B[Decreased O2 saturation <90% for >1 minute]; A --> C[Forced vital capacity < 50%]; A --> D[Negative inspiratory force < 60 cm H2O]; A --> E[Stiff nasal pressure <40 cm H2O];
```

Decreased O<sub>2</sub> saturation <90% for >1 minute

Forced vital capacity < 50%

Negative inspiratory force < 60 cm H<sub>2</sub>O

Stiff nasal pressure <40 cm H<sub>2</sub>O
