

## Epilepsy Types

```
graph TD; A[Epilepsy Types] --> B((Generalized Epilepsy)); A --> C((Focal Epilepsy)); A --> D([Generalized and Focal Epilepsy]); A --> E((Unknown if generalized or focal epilepsy));
```

### **Generalized Epilepsy:**

- EEG typically shows generalized spike-wave or generalized paroxysmal fast activity

### **Focal Epilepsy:**

- EEG may show focal or multifocal interictal discharges

### **Generalized and Focal Epilepsy:**

- Interictal EEG may show both generalized and focal/multifocal discharges, or epileptiform discharges may be absent.

**Unknown if generalized or focal epilepsy**
