

# Post CEA complications

## Perioperative

## Post operative

Transient Ischemic Attack

Ischemic stroke

Cerebral hyperperfusion syndrome

Cranial nerve palsies

Carotid restenosis

Cerebral hypoperfusion

Atheroembolism

Loss of cerebral autoregulation

Cerebral edema

Intracerebral hemorrhage

Hemorrhagic stroke

Seizures

Hoarseness, absent gag reflex, palatal paralysis (X nerve)

most common

Dysarthria, ipsilateral tongue deviation (XII nerve)

Hyperacusis, lagophthalmos, dry mouth, facial droop (VII nerve)

Glossopharyngeal neuralgia, absent gag reflex (IX nerve)

Ipsilateral shoulder drooping (XI nerve)
